Youssef Mohamed Abd El-Fattah

.NET Backend Engineer

Cairo, Egypt | 01500177961 | Gmail | LinkedIn | GitHub | Codewars

Summary

.NET Backend Developer specializing in building RESTful APIs with ASP.NET Core and .NET microservices. Experienced in Clean Architecture, CQRS, and design patterns (Repository, Unit of Work), with strong testing practices using xUnit and Moq. Proven track record building secure, well-structured APIs with JWT authentication, EF Core, and Serilog logging. Passionate about DevOps, Docker, Kubernetes, and CI/CD.

Education

- Faculty of Engineering, Computer Engineering Department, Benha University. **2022 – 2027**
- Grade: Excellent (92%)

Experience

- **DevOps Intern | Digital Egypt Pioneers Initiative (DEPI)** **Jul 2026 - Present**
  - Leveraged DevOps practices to bridge the gap between development and operations, enhancing backend application deployment, scalability, and cloud-native architecture.
  - Acquiring hands-on experience in building CI/CD pipelines, containerization, and infrastructure automation.
  - Technical Stack: Linux (RHEL), Bash Scripting, Git, Docker, Kubernetes, Nginx, GitHub Actions, Ansible, Terraform, Prometheus, Grafana, and AWS Cloud.
- **Web Development using .NET | Information Technology Institute (ITI)** **Jul 2026 - Aug 2026**
  - Built a solid foundation in full-stack web development, mastering C# programming, OOP logic, and relational database design using SQL Server.
  - Developed and integrated a web project utilizing ASP.NET Core for backend functionality and HTML5, CSS3, and JavaScript for interactive frontends.
- **Backend (.NET Core) Diploma | Route Academy** **Apr 2025 - Dec 2025**
  - Built two enterprise applications: a web app using ASP.NET Core MVC and a RESTful API, both following Clean Architecture.
  - Practiced Database-First & Code-First approaches with SQL Server and implemented Redis caching to optimize data retrieval and API response times.
  - Applied FluentValidation for input validation and secure data handling across application layers.

Courses

Built the same eCommerce domain twice under two different architectures, to learn the trade-offs directly rather than just read about them:

- **.NET Backend Bootcamp: Modulith, VSA, DDD, CQRS & Outbox | Udemy** **Aug 2026**
  - Built eshop-modulith: the same domain as a modular monolith — Catalog, Basket, and Ordering as isolated modules in one deployable, sharing a PostgreSQL database via per-module schemas, communicating in-process through MediatR, and using the Transactional Outbox pattern for reliable cross-module events.

  Links: Repository · Certificate
- **.NET Microservices: Architecture, Development, Deployment | Udemy** **Aug 2026**
  - Built eshop-microservices: 4 independently deployable services (Catalog, Basket, Discount, Ordering) behind a YARP API Gateway, with polyglot persistence (Marten/PostgreSQL, SQL Server, SQLite), RabbitMQ events, and gRPC for synchronous calls.

  Links: Repository · Certificate
- **.NET Microservices with Azure DevOps & AKS | Udemy** **Jul 2026 - Aug 2026**
  - Course by Web Academy (Harsha Vardhan). Built a 5-repository .NET microservices eCommerce system (Users, Products, Orders, API Gateway, Infrastructure) with polyglot persistence (PostgreSQL, MySQL, MongoDB), an Ocelot API Gateway, RabbitMQ event-driven cache invalidation, Redis caching, and Polly resilience policies.
  - Deployed to a self-hosted Kubernetes (Minikube) cluster via a GitHub Actions CI/CD pipeline; tested with xUnit, Moq, AutoFixture, and FluentAssertions.

- **ASP.NET Core 10 | True Ultimate Guide | Udemy** **Jun 2026 - Jul 2026**
  - Completed a comprehensive 86+ hour program covering ASP.NET Core MVC & Web API, EF Core, testing (xUnit/Moq), SOLID/Clean Architecture, and JWT security — including hands-on assignments and a GitHub-tracked capstone project.

  Links: Repository · Certificate
- **Data Structure & Algorithms using C | Udemy** **Mar 2026 - May 2026**
  - Mastered core data structures and 4 key algorithm strategies (Recursion, Divide and Conquer, Greedy, and Dynamic Programming) in C to build a strong foundation for optimizing backend systems.

  Links: Repository · Certificate
- **ChatGPT & Generative AI | Udemy** **Mar 2026**
  - Developed a deep understanding of Large Language Models (LLMs), focusing on leveraging AI tools to accelerate development cycles and integrate intelligent automation into professional projects.

  Links: Certificate
- **Git & GitHub | Udemy** **Mar 2026**
  - Developed proficiency in version control using Git and GitHub, mastering branching strategies and collaborative workflows to manage complex codebases effectively within a team environment.

  Links: Certificate
- **ASP.NET Core 8 Web API Clean Architecture + Azure Services** **Feb 2026**
  - Engineered scalable ASP.NET Core 8 APIs using Clean Architecture and integrated Azure services for robust, cloud-native solutions.

Projects

- **eshop-modulith**
- **eCommerce Microservices (Organization)**
- **data-structures-implementations**
- **hr-leave-management-api**
- **restaurants-api**
- **nz-walks-api**
- **bulky-book-mvc**
- **eshop-microservices**
- **harsha-aspnetcore-assignments**
- **clean-architecture-template**
- **ecommerce-api-onion**
- **gym-management-mvc**
- **best-store-mvc**

Skills

Technical Skills

- ASP.NET Core (MVC & Web API) / .NET Microservices & Modular Monoliths
- REST principles, Swagger/OpenAPI, gRPC
- JWT Authentication & Identity/Authorization
- Clean / Onion / Vertical Slice Architecture, DDD
- Middleware & Filters, pagination, filtering, error handling
- Codewars - 250+ katas solved (7-8 kyu) for algorithmic practice
- EF Core / Dapper / Marten / SQL Server / PostgreSQL / MySQL / MongoDB / Redis
- Repository Pattern / Unit of Work / CQRS (MediatR) / SOLID Principles
- YARP & Ocelot API Gateways / RabbitMQ / MassTransit / Polly / Transactional Outbox
- xUnit / Moq / AutoFixture / FluentAssertions / Unit Testing
- Docker / Kubernetes / GitHub Actions CI-CD / Terraform / Ansible / AWS
- Serilog / Structured Logging · Git / GitHub

Soft Skills

- Teamwork, Time management, Communication skills, Continuous Learning.
- Languages: English (Proficient) | Arabic (Native Language)
